

STOVE COMPARISON CHART

In choosing a stove, there are a host of variables you need to consider, including: performance in cold, wind, and altitude; weight, fuel capability and the length of your trip. Next, determine what kind of cook you are. If you're a gourmet, you may want a DragonFly or any one of our canister stoves for precise flame control. If you only need to boil water, then choose the XGK or WhisperLite. Then there's the convenience factor. If you don't mind priming and need the reliability of an "all conditions stove", our Liquid Fuel stoves are the best in the world. If you're all about convenience, pick a canister stove. Use this chart to help you pick the stove that's right for you.

SPECIFICATIONS

COMPARISON SPECS	FUEL	BOIL TIME 1 LITER WATER	WATER BOILED			BURN TIME	WEIGHT*	
STOVE SYSTEMS			Per 8 oz. (227 g) Fuel Canister	Per Ounce of Fuel		Per 8 oz. (227 g) Fuel Canister	Minimum	Packaged
 REACTOR 1.0L SKU# 06898 SKU# 06899	MSR soPro	3.5 minutes	19 liters	2.4 liters		~80 minutes	16.7 oz. 474 g	17.3 oz. 491 g

WEIGHTS Minimum weight of liquid fuel stove includes the stove and fuel pump only. Minimum weight of canister stove includes stove only.

NOTE These charts are for comparison purposes only. Testing was conducted in a room-temperature laboratory at sea level with 21 C | 70 F water.

Field conditions vary in every conceivable way, which will result in different burn and boil times.
